

PROCESS FLOW ARCHITECTURE

Government data comes in at the top - what runs it on the left - how people reach it on the right - what comes out along the bottom

eSAKSHI portal
The government's own record of every work

Runs the whole pipeline

Serves it securely

The screens officers use

Tracks each case

Cleans 4.8 lakh rows

Keeps the tidy copy

Finds the unusual ones

Predicts what will not finish

Reads the site board

What the officer carries

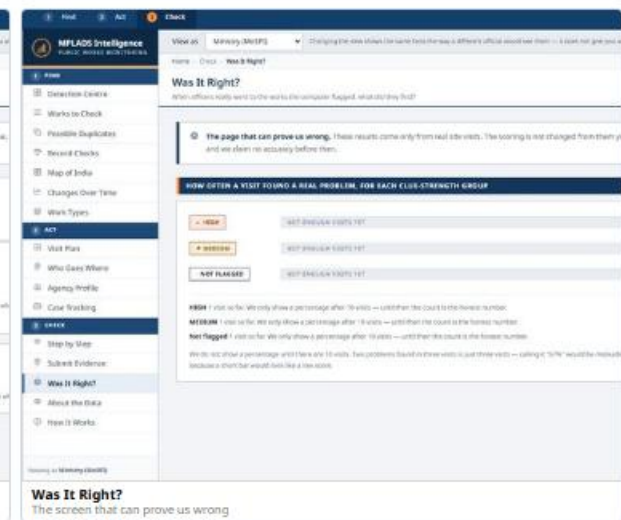

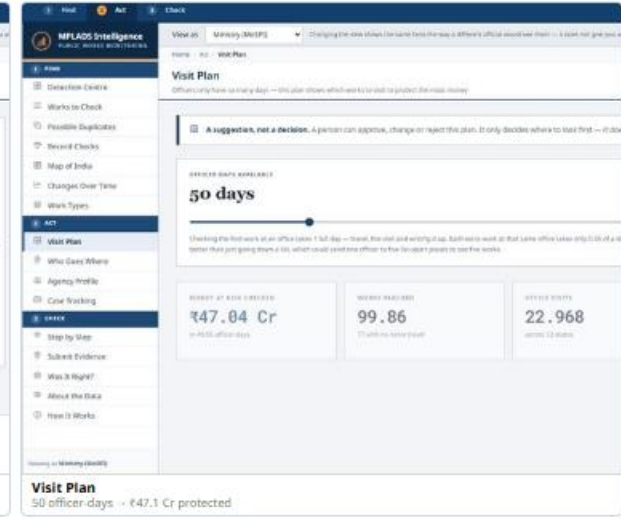

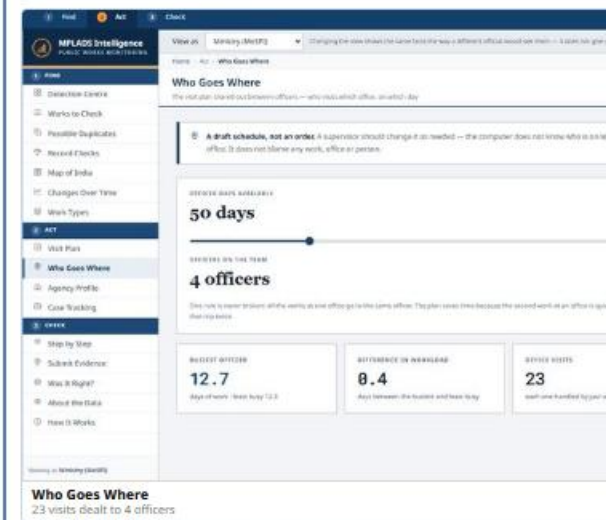

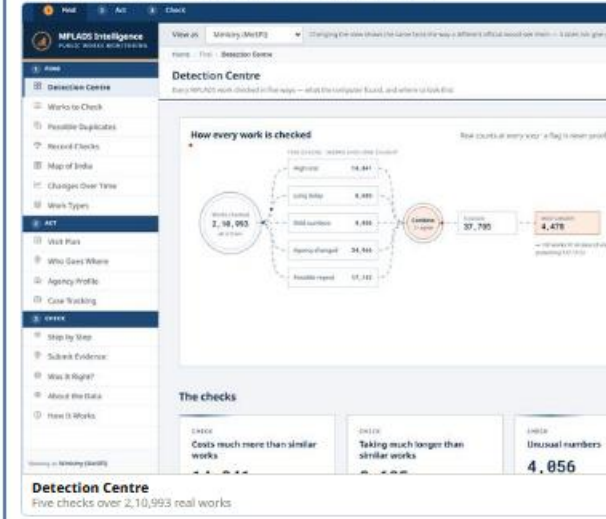

— data going in — results coming out

THE RULE — no fraud verdicts, ever. The data carries no fraud labels, so the output is an investigation lead with evidence; every one ends in "a human should check this".

WORKING MODEL / PROTOTYPE

Live screens from the running system, on the real national record
